SECTION HEADQUARTERS - 2602 South State St.

THEY JUST HAPPENED TO BE HERE

Two thirds (one million) scientists and technicians of the world live in the United States. They are responsible for all the progress that has been made; for everything that has raised this country above the level of China, India, etc. The other 139 million just happened to be here when this progress was made by the scientists and technicians and as a result they partake in the benefits of these accomplishments. These millions that happened to be here include all politicians--Republicans, Democrats, Socialists....--business men, financiers, economists, philosophers etc. Technocracy states that while you continue to let those who happened to be here' run your government, you will never enjoy the abundance scientists have made possible. The decision is up to you!

SERIES 3 January - February 1947 No. 1

"Our Country" Distribution

Wilton Ivie and the Executive Committee are working on a program for distributing copies of OC to prominent persons of this area. Reports are expected next month. Here is how you can help this distribution campaign: Buy ten or more copies of "Our Country" and hand them out to your friends with the statement that they are to read it and if they think it worth the money to buy it or else to return the magazine so someone else might read it. One of our functional members has tried this method and he reports that it works.

"SUGGESTION BLANK"

Enclosed with this issue of the Tech-News is a sample Suggestion Blank and an explanatory letter. We urge all members to make good use of it.

Published by Section 1, R. D. 11140, Technocracy Inc. Salt Lake City, Utah P.O. Box 625

McCaselin Meeting

Technocracy's Program was successfully presented to members and public at the Newhouse Hotel, Monday January 27, 1947. 129 persons attended the lecture, 26 signed X-Cards and 5 stayed to sign an X. Later in the week Mr. and Mrs. McCaselin were guests at a Membership meeting which was well attended by local and out-of-town members. Salute! Mr. and Mrs. Rex W. McCaselin for your functioning in this area.

NEW MEMBERS

A salute to some of the New Members of 11140-1:

Miss Bonnie Clay
Mr. Wilford P. Horne
Mr. J. O. Nash
Mrs. Ivy W. Nelson
Mr. David M. Young

These socially-minded Americans have joined Technocracy recently. We expect to be hearing more from them as they begin to function.

Membership Fees

1947 is here. You can make it the best year that Technocracy has enjoyed by your functioning. Our functional Treasurer would like to remind you that the time to pay your dues for this year is here, now. Help eliminate extra bookwork by paying your dues in advance for the entire year. Save the Treasurer and yourself a 'price system' headache.

Material to be Published in Tech-News

Any Governors or members may submit articles, announcements, research data or other material to be published in the Tech-News. As the Tech-News will be published the first week of each month, the deadline date for contributions will be the 20th of the preceding month. Hal Fox, Gov. of Publications

PLEDGES

\$2500. Yes twenty-five hundred dollars is the estimated cost of operating the Salt Lake City Section of Technocracy Inc. Rent, Literature, Mailing and printing expenses, office equipment, and so on are some of the expenditures that are necessary to educate the North Americans in this area. We need your help. The Treasurer has pledge cards available. Make your pledge now to aid your Section.

Revised List of Governors

The list of the Board of Governors of this Section after the Jan. 4 annual election of officers is:

Director:	Clyde W. Brady
Chief of Staff:	Wilton Ivie
Treasurer:	Alfred L. Wilson
Secretary:	Mrs. Gladys Higgins
Gov. of Education:	Ben H. Allen
Gov. of Finance:	Junius Iverson
Gov. of Headquarters:	Warren Myers
Gov. of New Membership:	George MacDonald
Gov. of Organization:	Max N. Tassainer
Gov. of Public Speaking:	D. A. Wootton
Gov. of Publications:	Harold L. Fox
Gov. of Research:	Hal V. Savage
Gov. of Symbolization:	Stephen Iwanick

CAR PAINTING

The Governor of Symbolization urges all Technocrats to have their car in first class shape so as to make a favorable impression on the Centennial tourists. See the Governor of Symbolization if that coat of grey is getting shabby or if you have not as yet painted your car grey.

Important Guest: "I don't often eat such a dinner as I've had tonight."
Small son of the house: "We don't either."

TECHNOCRACY

Technocracy Inc. is a non-profit membership organization incorporated under the laws of the State of New York. It is a Continental Organization. It is not a financial racket or a political party.

Technocracy Inc. operates only on the North American Continent through the structure of its own Continental Headquarters, Area Controls, Regional Divisions, Sections, and Organizers as a self-disciplined, self-controlled organization. It has no affiliations with any other organization, movement, or association, whether in North America or elsewhere.

Technocracy points out that this Continent has the natural resources, the physical equipment, and the trained personnel to produce and distribute an abundance.

Technocracy finds that the production and distribution of an abundance of physical wealth on a Continental scale for the use of all Continental citizens can only be accomplished by a Continental technological control—a governance of function—a Technate.

Technocracy declares that this Continent has a rendezvous with Destiny; that this Continent must decide between Abundance and Chaos within the next few years. Technocracy realizes that this decision must be made by a mass movement of North Americans trained and self-disciplined, capable of operating a technological mechanism of production and distribution on the Continent when the present Price System becomes impotent to operate. Technocracy Inc. is notifying every intelligent and courageous North American that his future tomorrow rests on what he does today. Technocracy offers the specifications and the blueprints of Continental physical operations for the production of abundance for every citizen.

NOTE:

Please note that a new class in Technocracy's Study Course begins February 7, at Section Headquarters, 2602 South State St. (See other side)

This Study Class is the only comprehensive source of information on Technocracy: The elements of science on which it is based, the analysis of the social situation on the North American Continent, and its program of social synthesis. No where else is this information available. Interested persons are welcome to attend this Study Class.

SECTION 1, R. D. 11140
TECHNOCRACY INC.
CALENDAR OF EVENTS

FOR THE MONTH OF FEBRUARY, 1947

All meetings will be held at Section Headquarters, 2602 South State St.
Salt Lake City, Utah. Admission Free unless otherwise noted.

- Feb. 3, Mon. Public Meeting: "America's Gestapo"
Speaker: Wilton Ivie. Americans are having their personal lives closely regimented. Who is keeping us in line and how? What are the aims of America's 'gestapo'?
- Feb. 7, Fri. STUDY CLASS: "An Introduction to Science"
Presented by Clyde W. Brady and Alfred L. Wilson.
NOTE: This is the introduction to the New Study Class.
- Feb. 10, Mon. Public Meeting: "The Concept of Ownership"
Speaker: Harold L. Fox. A definition of ownership as it exists in today's society. An explanation of ownership as will exist in the society of tomorrow. Do you believe that you own your own home?
- Feb. 14, Fri. STUDY CLASS: Lessons 1 through 4. "Matter, Units of Measurements, Energy, and The Laws of Thermodynamics."
Presented by: Don L. Allen and Hal V. Savago
- Feb. 17, Mon. Public Meeting: "From Here on Out"
Speaker: Clyde W. Brady. This country has operated on deficit spending for 15 years. The Federal debt is now \$260 billion. The procedure of deficit Federal spending has been curtailed. Now What? Can we continue to operate under a 'Price System'?
- Feb. 21, Fri. STUDY CLASS: Lessons 5 and 6. "Engines and The Human Engine"
Presented by Clyde W. Brady and Ben F. Jones.
- Feb. 24, Mon. Public Meeting: "A Day in the Technate"
Speaker: Don L. Allen. What can Americans expect of life in the Technate. Will it be notably different from our present way of existing. Above all, would Americans like living in a Technate?
- Feb. 26, Wed. Membership Meeting: Members Only. This will be a business meeting. Refreshments.
- Feb. 28, Fri. STUDY CLASS: Lessons 7 through 9. "The Flow of Energy on the Earth, Dynamic Equilibrium of Energy Consuming Devices, and Energy in Human History."
Presented by Wilton Ivie and Don L. Allen.

SUGGESTION BLANK

"The success of the individual shall be judged solely by his ability to function in phase with balanced load operations."

Facts Observed:

INSTRUCTIONS:

On the basis of certain things that you have observed, a problem or a project suggests itself to you. What are these facts which you have observed.

Analysis:

As you see it, what is the problem? What is it that should be done or needs correction?

Synthesis:

Explain how you think the problem should be solved. Keep in mind the practical realities of the situation.

Name: _____

Committee: _____

11140-1
TECHNOCRACY
Inc.

December 22, 1946

To: All Members of Section 1, R. D. 11140.

Subject: SUGGESTION BOX

1. Following the lead of many other Sections, who have tried it and find that it works, we have adopted the use of a Suggestion Box. This is how it works:
 - a. Any member may make suggestions regarding Section operations.
 - b. Suggestion Blanks are provided; these are to be filled out by the Member making the suggestion.
 - c. Sign it, fold it, and place it in the Suggestion Box.
 - d. The Chief-of-Staff will withdraw the suggestions and hand them to the Committees concerned. The Chief-of-Staff is directly responsible to you in regards to the consideration of your suggestion; if an answer is not received by you within ten days, see him about it.
2. Your Obligation: Commit all suggestions to the Suggestion Box. Do not present your suggestion verbally, and do not voice criticisms. If it isn't worth thinking through and writing down, it isn't worth considering. 'Talk' merely wastes the time of the Organization and interferes with function.
3. The Committee's Obligation: Give careful, intelligent consideration of your suggestion. It may be handled in one of these ways:
 - a. It will be put into effect.
 - b. It will be rejected or suspended for stated reasons.
 - c. It will be returned for clarification or more details.
4. The success of the individual shall be judged solely by his ability to function in phase with balanced load operation.

"...Whatever the future of Technocracy, one must fairly say that it is the only program of social and economic reconstruction which is in complete intellectual and technical accord with the age in which we live..."
--Encyclopedia Americana.

1939-1940-1941 editions

"Technocracy points out that abundance and security can only be achieved on this Continent through the use of more and more Technology, the degradation of more extraneous energy, the declining use of human labor and a lesser number of jobs.

"Our future in the New America does not lie in 60 million jobs. It lies in 200 million incomes.

"You have your choice! Join a political party for more deception, or join Technocracy and face reality."

Quoted from "There'll Always Be An England". This booklet available now. Write or visit your nearest Technocracy Section.

Printed in U.S.A.

TECHNOCRACY AND RELIGION

"What effect will a Technate have on my religion?"

Some variation of this question occurs to so many persons that its answer cannot be reiterated too often or from too many angles.

The word 'Religion' is used to loosely designate such a variety of emotional and mental - even economic and physical - attitudes and actions that unless it is somewhat restricted, nobody could predict how anything might affect it. However in its conventional forms - membership in one of the widespread organized churches - the answer would be: Without any doubt, it should be highly beneficial for your religion, as well as for yourself. Not that Technocracy claims any moralistic or 'Spiritual' qualities, for it does not. It is a branch of Science - the application of scientific procedure to the solution of social problems, which have been demonstrated to be primarily physical and therefore susceptible to such treatment. Through such application our physical environment, both corporeal and ambient, can be vastly improved. This applies not only to an individual here and there, but to EVERY CITIZEN OF NORTH AMERICA.

Of course, whether or not this would make us either 'good' or happy would rest entirely with each person. We would at least have the opportunity, which most of us now lack.

Herbert Spencer, the great English philosopher elaborately explained that there could be no conflict between 'true science' and 'true religion' because their proper fields of action were entirely separate. Science, including Technocracy, provides the ways and means whereby we may, if we sufficiently desire it, live much better lives than most of us can now do.

The function of religion as the guidepost toward that better life would be much more effective if facilities for its attainment were equally available to all.

by Henry B. Higgins.

PUBLIC LECTURES

All meetings will be held at Section Headquarters
2602 South State Street. Starting time: 8:00 pm.

September 2. "Security vs. Abundance"

Speaker: Al Wilson. An analysis of security conditions and effects with a historical introduction. The conditions for abundance and where it may be had. What to do with an abundance.

September 9. "North America's Destiny"

Speaker: D. A. Wootton. For security in America--for world peace which only a technological operation of this continent could maintain, let us keep America in peace and set about the guiding of North America to its technological destiny of abundance as one nation and one people.

September 16. "The Sermon of Abundance"

Speaker: Clyde W. Brady. As the impact of technologically produced abundance with our present economic structure takes place, only one voice is heard, "Abundance destroys the 'Price System.'"

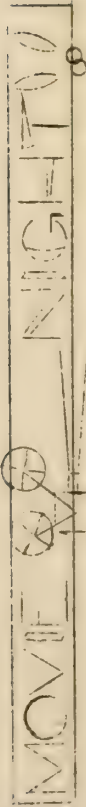

September 23. "Technocracy Today"

Speaker: Harold L. Fox. As world events move Technocracy moves along at an ever increasing speed. This lecture tells of Technocracy's purpose in the World Today.

September 30. "The Meaning of Freedom"

Speaker: Wilton Ivie. The Freedom that we have gone to war to maintain. Is it being endangered today? Do we have Freedom today? What will the effect of a Technate on Freedom.

All the above public addresses are admission free. Learn NOW about the New America. Questions welcome.

Each Wednesday Night at 8:00 pm at 2602 So. State Street Governor Stephen Iwanick presents motion picture shorts on a large range of subjects. No detailed program listings are available this month but arrangements are being made so that this bulletin can publish the films in advance. All shorts are guaranteed to be up to date and interesting. Watch your daily newspaper for the listings.

INTRODUCING THE SPEAKERS

Alfred L. Wilson has been our Section Treasurer for many months and since this Section first received its charter Al has been an active and functional Technocrat. Don't miss Al Wilson's address on September 2. Topic: "Scarcity vs. Abundance"

D. A. Wootton is our Governor of Public Speaking. Technocrat Wootton is a capable lecturer and has been associated with our local group for a long time. On September 9, Mr. Wootton will discuss "North America's Destiny."

Clyde W. Brady, the Director of Technocracy in the city, will present "The Sermon of Abundance" on September 16. Don't miss this capable presentation of an interesting topic.

Harold L. Fox, recently returned from the service and functioning as our Section Secretary, will discuss "Technocracy Today". If you are wondering what Technocracy's activities are today don't miss the September 23 public meeting.

Wilton Ivie, nationally known Technocracy writer, and the Chief of Staff of our local Section will speak on "The Meaning of Freedom" on Sept. 30. Mr. Ivie has just recently returned from visiting Continental Headquarters.

NEW OFFICIAL LITERATURE

Now made available for continental distribution is the new official pamphlet "Make Way for Social Change". This timely publication consists of three great articles by Wilton Ivie, published for the first time in booklet form. The three articles are: A Change of Concepts

Make Way for Social Change

and

Government by Skill

"THE ATOM SPEAKS"

I am the ATOM. Day dawned for me one year ago on a New Mexico Desert. Since my abrupt entrance into this befuddled world my actions have caused many men to make comments about me.

Albert Einstein says: "The release of atomic energy has not created a new problem. It has merely made more urgent the necessity of solving an existing one. One could say that it has affected us quantitatively, not qualitatively."

READ my History: "Day Dawns for the ATOM"

This article appears in the latest issue of 'The Technocrat'.

Also in this issue our Chief of Staff, Wilton Ivie, has contributed an excellent article:

"Unearned Income".

THE SECTION FUNCTIONS

Public Meetings: Every Monday Night at Section Headquarters a group of members and interested non members have attended our series of public meetings. Director Clyde Brady presented the following series of lectures during the last month:

- July 29. "Progress of Man"
- August 5. "The Next Business Depression"
- August 12. "The Passing of Human Toil"
- August 19. "Human Inertia"
- August 26. "Whither America?"

Next month's public lectures bring to you five capable speakers who will present various phases of Technocracy to the public. (See page 7)

Movie Night: Technocracy's sound movie equipment has been busy this past month. Here are some of the movie shorts Mr. Iwanick and his Visual Education Committee has shown during the last month:

- "This Amazing America" (Technicolor)
- "Fight for the Skies"
- "Unseen Strength"

Watch your daily newspaper for the title of each Wednesday night's movie. Join the crowd at SHQ each Wednesday night at 8:00 for the latest Visual Education selected short.

Study Class: Every Friday Night the Study Class meets to study the trends and operation of our continent. The Study Class uses the Technocracy Study Course as a guide and Governor del Savage guides the discussions in a Seminar manner. The public is welcome and invited to attend this month every Friday evening at 8:00 for the Study Class.

Magazine Article: Chief of Staff, Wilton Ivis, has scored again with "Unearned Income", an article in the latest issue of "The Technocrat". You will not want to miss this pertinent article. For order blank, see Page 3.

Symbolization: Now Highway signs to symbolize Technocracy are going up and existing ones are getting their faces painted. Steve Iwanick assisted by Warren Myers are responsible for this function. Steve is also conducting frequent tours to show off our fleet of grey cars.

Literature Mailing: More people are learning about Technocracy, thanks to the activity of our Governor of Publications, Henry Higgins. All month-old magazines are sent free of charge to selected mailing lists to introduce them to our activities.

Bouquets: Thanks to the aid of some of our members valuable information was obtained in a recent telephone survey. For their aid, bouquets to:

- Mrs. Mary Tassiner
- Mrs. Gladys Higgins
- Mr. Frank Lindsey
- Mr. Edward D. Johnson

Change of Address: Some of the addresses that we have may be out of date. Check your address and if it is not correct, please drop us your correct address on a penny postcard. Thank You.

LEWIS FRAZEUR LECTURE TOUR

As this edition of the bulletin goes to press we have had no further information of the Lewis Frazeur Lecture Tour. The Tour Party is expected in Salt Lake City sometime during the latter part of September.

You may be sure that if your name is on our mailing list we shall inform you of the date this lecture will be held.

Time is growing short; the death knell is ringing for the 'price system'. Don't let ignorance of the times catch you in its gory clutches. Technocracy offers you this and many other opportunities to become an informed American.

SECTION 1, TECH-NEWS R.D. 11140

SERIES 2 OCTOBER, 1946 NO. 4

PLATINUM HANDCUFFS

A man in high office cannot long maintain his integrity and keep his position.

He will either capitulate or be smeared. But he will not need to be offered bribes or crudely how to vote nor to do this thing or that.

He will be up in society, with a big home on Long Island or on the Hill with several fine cars in the garage, all the excitement of a great city, a life of ease, comfort and power. Will he wish to give up all of that for a principle? Seldom. He is shackled with platinum handcuffs.

Published by Section 1, R. D. 11140, Technocracy Inc. Salt Lake City, Utah P.O. Box 625

MAKE IT BIG

Americans have conceived and achieved the largest jobs ever undertaken by man. A transcontinental railroad and the Panama Canal were among our first momentous accomplishments, to be followed by many others of equal or greater magnitude. We have built up this Continent more than have the people of any other continent. The resources and energy of this area, transformed by technology and integrated by skill, is the American Way. It is new. It is startling. It is a concept that challenges the intellect of man. Is it too much for Homo sapiens?

The human race as a civilized organization of social beings has grown up under 7000 years of scarcity concepts and small operations. Seldom has man tackled anything of grandeur. He has at times imagined things of major magnitude, but seldom has he been able to carry out these concepts. The Pyramids, the Colossus, the Cathedrals, were sporadic monuments to early man's determination to overcome the physical handicaps that stood in the way of the realization of his concepts. Such achievements in the past demanded authoritative power, slave labor, and a general religious zeal.

But, on this Continent, a new era dawns. With accumulated scientific knowledge, with improved technology, and a Continent rich in resources and energy sources, no concept is too great for North Americans. The physical limitations of the past 7000 years no longer stifle us, only the habit patterns built up during that long age of slow progress. Americans have the means and the know-how to reshape their Continent to their liking. A Continental concept is here to replace the erstwhile back-yard concepts of hand tool operations. Only the baseless fear of going ahead is holding us back.

FREE PUBLIC LECTURES

October 8. "Technocracy - The Answer to the Veterans' Problems"

Speaker: Malcolm Dorton, Authorized Technocracy Speaker from Los Angeles. This meeting will be held at NEWHOUSE HOTEL, Tuesday, 8:00 p.m.
(See also pages 3 and 8)

All meetings below will be held at Section Hqgs. 2602 South State Street. Starting time: 8:00pm.

October 14. "Reclaiming Our Heritage"

Speaker: Wilton Ivic. Americans, who have the richest heritage on earth, are in danger of losing it through enterprise and wasteful operation. How shall they reclaim it?

October 21. "Living on Borrowed Time"

Speaker: Clyde W. Brady. The Price System has ceased to function under its own steam. It is being kept alive by artificial respiration. What does this forebode for the near future?

October 28. "Functional Operation"

Speaker: D. A. Wootton. When political and business operations fail in the face of technology and abundance what form of controls will work, and how?

November 4. "Voting Against Yourself"

Speaker: Harold L. Fox. When you vote on political issues, you vote for a continuation of the status quo--you vote against your own welfare. How can you register a vote that really counts?

November 11. "Handouts for the Wealthy"

Speaker: A. L. Wilson. What do you think of wealthy people who deprive themselves of the wealth they have, and go around seeking palsy handouts? Are you doing the same? A challenge to all Americans.

MANPOWER VS. HORSEPOWER

Most unskilled and many semi-skilled and skilled laborers, to say nothing of a large share of clerical 'hired help', are grossly overpaid for what they actually do. At \$2.00 per day, they would still be grossly overpaid.

How come? With proper organization and mechanization, 'Freddy Kilowatt' can easily take over their work, do it faster and better, and never squawk about hours and working conditions; go on jurisdictional strikes, etc. Each kilowatt, at a cost of a very few cents, will do more physical work than 10 really ambitious men can maintain for a day. All it needs is proper direction, and the boys who build automatic controls delight in furnishing such direction for almost any kind of an operation. The only catch is that the operation must be large enough to justify the initial cost of the automatic machinery.

More and more business men are learning this all the time. They have to do it to stay in business. 'The laborer is worthy of his hire' but kilowatts, our real laborers, can be hired cheaply. How long will it take us to learn; men are created to live, machinery is made to work?

---Henry Higgins-Oct. '46

* * * * *

The brave thing, of course, would be to attack not Russia but something really tough, like our domestic problems.

---Salt Lake Tribune, Sept. 27, 1946.

POLITICAL WASHINGTON is reported concerned over the stock market slump. While President Truman and other leaders tend to minimize the importance of the Wall Street phenomenon, several top government economists admitted they fear a depression is coming in the United States. The consensus is that it will happen in about eight months.

---Vancouver News-Herald

Page 6

Technocrats have too often inherited from their ancestors the small scale concept of doing things and frequently carry these small concepts and the attendant fear of doing big jobs into 'Section operations'. This constitutes one of the most serious handicaps to the growth of Technocracy on this Continent. What we must realize as Technocrats is that we have undertaken the biggest job ever attempted by man - a social change from all that was yesterday to a brand new tomorrow. It is all or none. Our bridges have been destroyed behind us. There can be no retreat, just forward progress, or defeat. As Technocrats we have committed ourselves to social change. From here on out all that we think and all that we do must be but the minutiae of the progress toward the New America.

This program demands huge concepts and ever greater undertakings. Let no Technocrat turn tail and whine defeat in the face of the job before us. There is only one command that we shall heed --

ADVANCE! AND MAKE IT BIG!

MALCOLM DORTON SAYS:

"Returned Servicemen who well know that America supplied ourselves and our allies with the materials and weapons of war, fed half the world, and at the same time produced \$92 billion of consumers goods in 1944, with 27 million of our most able-bodied citizens withdrawn from the production of physical wealth for civilian consumption now ask the embarrassing question: 'If we did it then why can't we do it now?' The Technocrats can tell you and we do!"

HEAR MALCOLM DORTON. Hotel Newhouse on October 8, Tuesday 8:00 p.m. Subject: "Technocracy -- The Answer to the Veterans' Problems".

Page 3

SECTION ACTIVITIES

Public Meetings: The Public Speaking Committee functioned notably during the past month. Interest and attendance was good, and the question periods were lively. The lectures were:

Sept. 2. "Scarcity vs. Abundance" - A. L. Wilson.

Sept. 9. "North America's Destiny" - D. A. Wootton.

Sept. 16. "The Sermon of Abundance" - C. L. Brady.

Sept. 23. "Technocracy Today" - Harold L. Fox.

Sept. 30. "The Meaning of Freedom" - Wilton Ivie.

Movies: Steve Iwanick has given the Section's Motion picture equipment a good workout this month. Some of the films were:

"The Making of a Tire" (Technicolor)

"Jet Propulsion" (Technicolor)

"First Aid for the Injured"

"North Western Skies" (Technicolor)

"Television - Sightsseeing at Home"

"Building Boulder Dam"

Movies are shown every Wednesday at 8 p.m.

Grey Fleet: Another Grey Car was added to Technocracies growing Grey Fleet. Mr. and Mrs. Danforth members-at-large, and recent visitors to 1140-1, are the proud owners of a shiny Grey Car. And Steve Iwanick is the proud painter. Justly so, Steve.

Study Class: Hal V. Savage, Governor of Education, announces the continuance of the Study Class, on Friday evenings, 8 p.m. Interested visitors welcome.

Added Technology: The Publications Committee has made good use of the Section's new mimeograph. Two color work on the cover of the Tech-Mews and on the signs for the Dorton Tour advertising demonstrates some of the capabilities of our new equipment.

Welcome Back: Some Technocrats like to go up one of our many beautiful canyons to get away from

Page 4

price interference worries. But when our Chief of Staff, Wilton Ivie goes vacationing he carries literature, writes articles, gives lectures and collects spiders. We don't know how the spiders got in there, but we do know that on his recent vacation, Mr. Ivie got into the news. A bulletin from Toronto informed us that he delivered a speech to the public in that Area. Back home again our Chief of Staff is soon functioning at nearly every activity at SHQ.

Pamphlet Revised: Not only has he contributed monthly to 'The Technocrat' and presented frequent lectures, but Technocrat Ivie has recently revised "America, Must Show the Way". This pamphlet is an official publication of the Organization, as soon as it is off the press, it will be available to members and contacts of this Section. Watch for the announcement.

Magazine Article: "Full Employment - How and Why?" is the title of a pertinent magazine article by Wilton Ivie. This article appears in the latest issue of 'The Technocrat'. This field magazine is available at your Section.

Section Visitors: Out-of-town Technocrats who have visited our Section Headquarters this month are:

Mrs. Devere Omdahl Pomona, Calif.
Miss Jackie Shipp Pomona, Calif.
Mrs. F. S. Davidson Los Angeles
Kenneth Barnes, Motor Corps Captain Los Angeles

R. G. Gillespie Rexburg, Idaho
L. W. Gillespie Rexburg, Idaho
A. F. Feller Oakland, Calif.

Mr. and Mrs. W.G. Danforth Couer d'Alene, Idaho
Welcome to our Section, Technocrats. Come again.

Page 5
